**Paranormal Investigator Uncovers Truth About Goatman**

*For immediate release:*

Paranormal investigator and author J. Nathan Couch's latest book *Goatman: Flesh or Folklore?* is the first of its kind—an in-depth examination into more than 160 years of encounters with terrifying, goatlike humanoids across the United States. Available October 28, 2014, *Goatman* separates real-life experiences from the absurd urban legends that surround them.

Youths all over the U.S. have thrilled their peers with alleged violent encounters they've experienced with hairy, hooved entities on the outskirts of suburbia. These stories are often explained away as lies or pranks by skeptics. Even many monster experts theorize Goatman is nothing but a Bigfoot misidentified by frightened teens.

J. Nathan Couch has collected sightings both infamous and obscure while debunking the various Drive-In movie-inspired origin stories that surround these creatures in any given community.

"These goat-man encounters are almost always laughed away by the media, and are largely ignored by many experts within the field of the unexplained. This book takes decades of information, sorts through the bunkum, and leaves the reader with the facts." says J. Nathan Couch.

J. Nathan Couch became fascinated with Goatman after moving to Wisconsin in 2007, where he interviewed a man who had an encounter with a creature resembling a Greek satyr in the woods of Kewaskum—a small town in northern Washington County. He's since spent years tracing the history of Goatman in America. Learn more at [www.jnathancouch.com](http://www.jnathancouch.com).
